

HEAR YE, HEAR YE NEWS and VIEWS of EVML

Volume 23, Issue 1

October 2013

Summer News

Good news! It looks likely that the Carson City Rendezvous will return to Mills Park in 2014. They've started a Facebook page (Carson City Rendezvous 2014) for further information as it becomes available.

We will have our Potluck dinner at Loretta's house immediately preceding the December meeting.

We are getting together a powder order soon.

If you are interested in ordering some powder contact me or Kryer

Twofalls

Secretary EVML

twofalls@charter.net

The Nevada Day Parade will be Saturday the 26th of this month. Kryer will pass on the line up location and start time for us as soon as he can.

Nominations for club officers will be held at the November meeting (11/1) with elections to be held at the December meeting (12/6).

SOME MUZZLELOADING SAFETY DO'S AND DON'TS

DO's

Read and understand your instruction manual. If you didn't get one with your muzzleloader, order one from the manufacturer. They will send you one for free.

Many companies now have a web site and online manuals are common.

Wear shatterproof shooting glasses and ear protection, as both percussion and flintlock guns may shower sparks and bits of caps/flints when fired.

Treat a misfire or failure to fire as though the gun can fire at any second. Wait at least a minute with gun pointed at the target.

Be sure all spectators are completely behind you when firing. Flames and bits of caps/flint sometimes exit from the side of the gun. It is good shooting etiquette to warn other shooters that you are about to fire a flint lock next to them.

DON'Ts

Never fire a muzzleloader unless the ball is firmly seated against the powder charge. Firing a muzzleloader with the ball off the powder or part way up the barrel may cause serious damage to the firearm and possibly serious injury to the shooter.

Do not exceed manufacturer's recommended maximum powder charge.

Never use FFFFg black powder for a charge in any muzzleloader at any time. The only safe use for fine priming powder is for the priming of a pan on a flint lock. Fine powders will

cause excessive pressures and could very well burst your barrel.

Never lean over (or stand in front of) the muzzle at any time.

Never attempt to shoot out a projectile which is not firmly seated against the powder charge.
